Technical Skills

- **Languages**: C++, Python, JavaScript, CSS, HTML
- **Development**:MySQL, MERN Stack (MongoDB, Express.js, React, Node.js)
- **Cloud Technology**:Amazon Web Services (AWS)
- **Core CS & Tools**: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, SDLC Methodologies, Git, GitHub, Agile Framework

Education

B.Tech in CSE (Gaming Technology), Vellore Institute of Technology	**CGPA: 9.83 / 10.0**	2023 – 2027
Class XII, Govt. HSS Hinota Kalan, Hatta	**Percentage: 95%**	2023
Class X, Govt. High School Bhainsa, Hatta	**Percentage: 95%**	2021

Work Experience

- **AI Intern**, Microsoft Initiative with Edunet Foundation & AICTE — Apr 2025 – May 2025
  - Selected for a national 4-week internship as part of a Microsoft & AICTE initiative in collaboration with Edunet.
  - Developed **EduMentor AI**, a RAG based learning platform using the Gemini API, FAISS vector search, and embedding-based context retrieval to generate personalized study plans and quizzes.

Projects

- **My-Campus – Campus Life Management Platform (MERN Stack)** Live — GitHub
  - Built a centralized campus management platform with RBAC, supporting **150+ users** across Student, Faculty, and Admin roles.
  - Implemented 5+ modules including QR Attendance, Notes Sharing, Announcements and Faculty Search managing 300+ faculty records with Zustand; reduced attendance time from 10–15 min to 5 min.
  - Enhanced security with dynamic QR attendance, device fingerprinting, bcrypt, JWT, Privacy Policy, and Cookie Consent; reduced DB search latency by **60% (200ms → 80ms)** through query optimization and indexing.
- **Fix_It_Now – (MERN Stack + Machine Learning)** Live — GitHub
  - Built a MERN-based grievance platform for centralized complaint registration, tracking, and resolution.
  - Developed an admin dashboard with complaint tracking, status management, analytics, heatmaps, and government scheme information.
  - Implemented ML-based complaint prioritization, keyword fallback, and a RAG-based AI assistant; secured APIs with rate limits of **100 General req/min per IP , 10 auth req/IP per 15 min, 20 chatbot req/min, and 30 issues/hour** to mitigate brute-force, DDoS, and scraping risks.
- **CloudFlow – Project Management Platform (React + Node.js + PostgreSQL + AWS)** GitHub
  - Built CloudFlow, a unified collaboration workspace with organizations, projects, Kanban boards, task management, RBAC, and real-time communication.
  - Developed core features using MERN, PostgreSQL, and Prisma, including JWT authentication, Socket.IO comments, drag-and-drop Kanban, activity logs, granular permissions, and secure file attachments.
  - Enabled scalable deployment with an AWS-ready architecture using EC2, RDS, S3, CloudFront, and Load Balancer, with Vercel + Render for demonstration.

Achievements & Coding Profiles

- **Be HackFest**: Secured 3rd place (Individual Category) at Be HackFest, a hackathon organized by Bloom Energy.
- **District Topper**: Achieved the highest score in the district in the Madhya Pradesh Board Examination (2023).
- **Coding Profiles**: Earned Knight Badge (Top 25% globally) on LeetCode, secured Institute Rank 3 on GFG.

Extra-Curricular Activities & Certifications

- **Student Volunteer**: Assisted in coordinating the Cognizant campus recruitment drive at VIT Bhopal University.
- **Core Member, VRGC Club**: Contributed to technical events, workshops, and gaming/VR activities at VIT.
- **AWS Certified Cloud Practitioner** – AWS – Certificate
